Publications:

Elmore CE, Mitchell EM, Debnam K, Keim-Malpass J, Laughon K, Tanabe KO, Hauck FR. Predictors of cervical cancer screening for refugee women attending an international family medicine clinic in the United States. *Cancer Causes Control*. Doi: 10.1007/s10552-022-01612-8. In press.

Elmore CE, Keim-Malpass J, Mitchell EM. Health inequity in cervical cancer control among refugee women in the United States by country of origin. *Health Equity*. 2021;5(1):119-123. [doi: 10.1089/hecq.2020.0108](https://doi.org/10.1089/hecq.2020.0108)

Elmore CE, Laughon K, Mitchell EM. Self-collection of samples for HPV testing to increase participation in cervical cancer screening by immigrant women: An integrative review. *Public Health Nurs*. 2020;37(5):677-695. [doi: 10.1111/phn.12782](https://doi.org/10.1111/phn.12782)

Professional Service:

Dr. Jennifer Clifton and **Dr. Kristen Stucki** authored the position statement [Trauma-Responsive Care for Youths in Correctional Facilities](#), which the [National Commission on Correctional Health Care](#) adopted in the interest of improved health, safety, and satisfaction for all youth and staff.

Dr. Julie Gee accepted a Board Member position at [Neonatal Rescue](#), a Utah-based nonprofit social and medical venture that developed low cost, easy to use continuous positive airway pressure and pressure control ventilators for low resource countries. In the developing world, nearly 25% of neonatal mortality could be eliminated if healthcare providers had access to ventilators and proper training. Neonatal Rescue partners with developing countries (e.g., Cambodia, Zambia, Madagascar, Guatemala) to change healthcare systems, distribute NeoLife and AdultLife ventilators, educate healthcare providers, empower patients and healthcare providers, and improve health outcomes.
